

MSUD

Association of the Central Sterilization Units

Dokuz Eylül Üniversite Hastanesi

1.National Sterilization Conference

02 - 04 March 2006

Sürmeli Efes Hotel
Selçuk Izmir

PRESIDENT'S MESSAGE

Estimable Colleagues Interested in Sterilization Subject,

4 years from the sterilization courses which we have started in the year 2001 and around one year since the “Europe Sterilization Conference” which we have realized on May 2004 have passed. Primarily our DOKUZ EYLÜL UNIVERSITY HOSPITAL and especially MSÜD (ASSOCIATION OF CENTRAL STERILIZATION UNITS) which is the young and efficient association of our center, who has realized the “firsts” on the subject of “Sterilization” in Turkey, are conscious about their mission on the subject of education, development and renovations. With this reason and at the consequence of intensive demands, we have decided to undersign another “first” again on the month of March, of the year 2006 with its topics and invited speakers. We have decided to invite yourselves to the conference titled “THE FACTORS WHICH AFFECT THE STERILIZATION PROCESS AND THEIR SOLUTIONS” during which the problems experienced on every issue under the word (topic) sterilization shall be laid on the table with appropriate conferences and panel discussions.

We call yourselves to open the operational problems of each small sterilization unit to newly established or yet to be established big sterilization units which seems the most minor or without solution to argument without forgetting the realities of our country.

In the event that our center and invited speakers' experiences can shed a light to yourselves, we believe that we will get close to our target.

With this conference which will be the arena of being equipped with new information, to be advised of the developments and the most important of all, to seek solutions to the problems lived, arguing and solution suggestions; we have planned to make the initial step and if the time is not sufficient, to continue on this basis periodically.

Remain happy and healthy until we relay the main topics and other details to yourselves in the second announcement.

Spec. Hem. Hülya Erbil
President of the Association
Of Central Sterilization Units

Prof. Dr. Sedef Gidener
Chief of Staff of Dokuz Eylül
University Hospital
