

Annual WFHSS Workshop "CSSD" Muscat, Oman
November 1st to November 2nd, 2006

Supported by: Sultanate of Oman
Ministry of Health
Infection Control Section
Department of Communicable Diseases Surveillance & Control

Ladies and Gentlemen, dear friends and colleagues

In 1999 the WFHSS was founded with the aim of disseminating knowledge about sterilization on the basis of the European norms. The member states of the European Union for became evident that 'sterilization' does not stop at the borders of the old continent. The interest of non-European countries was very big. Globalization, too, apparently had a profound effect on the phenomenon and took the decision at the meeting on the occasion of the European congress in Lillehammer to reflect in its name this new reality. From WFHSS: World Forum for Hospital Sterile Supply.

The big success in Bulgaria and Latvia confirmed us to carry out the "Middle East Workshop" under the flag of the WFHSS. The Middle East Workshop will take place in Muscat, Oman, from November 1st to November 2nd, 2006, the topic will be:

WFHSS - Decontamination in the Gulf - The role of the CSSD.

We would be pleased to welcome you to this event as a participant and a partner. The annual workshop shall bring the partners from practice, science, politics and industry together as kick off to a partnership in the future.

We are looking forward to meet you in Oman.

With best regards
The Organization Committee
